

Eurocave invented the freestanding temperature controlled wine cabinet in 1976. The Essentielle line of Eurocave wine cellars offers optimum storage capacity, clean lines and proven efficiency- all at an affordable price. Consider these features:

- Exclusive electronic "Twin Process" regulates temperature
- Cabinet insulated with equivalent R-value of 2 meters of earth
- VES vibration technology eliminates unwanted vibration.
- Easy to read and use electronic control panel
- The temperature can be set from 9-14° celsius
- Available in reversible solid or UV thermal glass door
- Two-year warranty on parts and 10 year corrosion warranty
- Energy Efficient (Average consumption of .3-.9 KWH per day)
